SPECIFICATIONS

Height: 39"
Seat Height: 18"
Width: 18.5"
Depth: 20.5"
Sitting Depth: 18.5"

This chair is the first of its kind: an elegant traditional chair that is stackable. The design of this chair was made possible by a revolutionary new joining technology that uses precisely spaced steel rods and space-age epoxies to create a seat joint that is stronger than the wood itself. The University of Chicago has chosen this distinctive Arts & Crafts design for their restoration of Bartlett Hall, a Neo-Gothic dining hall built at the turn of the century.

Bartlett Hall Arm

Stacking

(Available in Original, 10-60, and Wide)

SPECIFICATIONS

Height: 39"
Seat Height: 18"
Width: 25.5"
Depth: 23"
Arm Height: 26"
Sitting Depth: 17.5"

Like many of our arm chair designs, this chair started as a side chair. Our designers have done a nice job of preserving the period look of the chair, while also allowing these elegant arm chairs to stack up to six chairs high. And with our proprietary Eustis Joints[®] holding the arms to the chair, comfort and elegance do not require a sacrifice in durability.
