SPECIFICATIONS

Height: 34"
Seat Height: 18.5"
Width: 17.5"
Depth: 19"
Sitting Depth: 16"
Hardwood as Shown: American Ash

This chair is a handsome and durable reproduction of the chair used by Thomas Edison for his 1878 New Jersey laboratory, where he invented the incandescent light bulb. Harvard University chose this chair for their \$28 million restoration of Memorial Hall, creating what is arguably the most beautiful college dining hall in America. The Edison Chair is offered only in American Ash, but it can be stained to match most other hardwoods.
