A New England prep school needed an alternative to traditional church pews that would provide them flexibility in the use of their 200 year-old chapel. Boston architect Hoyle Doran & Berry designed this elegant modular pew, but found that conventional joinery was not strong enough to meet its unique requirements. Our proprietary Eustis Joint[®] was the missing ingredient, and allows us to build chairs that are not only warranted for 20 years, but will endure for generations.
