

Merrimac

Stacking

(Available in Original, 10-60, and Wide)

SPECIFICATIONS

Height: 37"
Seat Height: 18"
Width: 18"
Depth: 21"
Sitting Depth: 17.5"

The Merrimac is a slight design variation on the Bainbridge Jr. chair, requested by Boston architects Amsler, Mashek, MacLean for the Merrimac Public Library. The Top Back of the chair and the tops of the Back Posts are curved instead of square. This seemingly minor change has a significant affect on the overall look of the chair, which is now as much Transitional as it is Arts & Crafts.

Merrimac Arm

Stacking

(Available in Original, 10-60, and Wide)

SPECIFICATIONS

Height: 37"
Seat Height: 18"
Width: 23.5"
Depth: 21"
Sitting Depth: 17.5"
Arm Height: 26"

Who says an arm chair can't stack? We don't! This elegant arm chair stacks 8-10 chairs high, just like its side chair cousin. And the arms are attached using our proprietary Eustis Joints[®], so they can take a lot more abuse than comparable designs made with conventional joinery.
