

# Fairfield Side

## SPECIFICATIONS

Height: 38"  
Seat Height: 18"  
Width: 19"  
Depth: 21"  
Sitting Depth: 18"

This chair is an adaptation of the styles of Wright, Greene and Stickley from the Arts & Crafts movement of the early 1900s. True to that period, the box-frame design and mortise and tenon construction combine to produce an elegant chair that is durable enough to withstand decades of rigorous use. Furthermore, it comes with a 10 year warranty against joint failure. The original Fairfield is built of red oak, but it can be made in other hardwoods. Like most of our chairs, the Fairfield is also available with a wooden seat.

# Fairfield Arm

## SPECIFICATIONS

Height: 34"  
Seat Height: 18"  
Width: 23"  
Depth: 22.5"  
Sitting Depth: 18"  
Arm Height: 26"

The Fairfield chair was our very first library chair, but was not built in an arm chair version for several years. Like all of our arm chairs, the arms are attached to this chair with our proprietary Eustis Joint<sup>®</sup>, a system using concealed steel rods and high-strength epoxy to create a joint that is stronger than the hardwood from which the chair is manufactured. The leg joints are constructed with our mortise and tenon construction and come with a 10 year warranty.
