

Oberlin

SPECIFICATIONS

Height:	40"
Seat Height:	18"
Width:	18.75"
Depth:	19.5"
Sitting Depth:	17.5"

The Oberlin chair was designed in collaboration with Boston architects Payette Associates and provided a design bridge between two off-the-self alternatives. Its curved back and graceful back slats and back posts give it a delicate elegance as well as easy comfort. The Oberlin can be produced in other American hardwoods and finished in a variety of stains. In addition, it is constructed with our mortise and tenon joinery, ensured with a 10 year warranty.
